2019 - 2020

- Baren Bruck Hr.Sec School , Bangalow Surandai, 64%

### SSLC (Secondary School Leaving Certificate)

2018

- Baren Bruck Hr.Sec School , Bangalow Surandai, 87%

## SKILLS

HTML , CSS

JAVASCRIPT

BOOTSTRAP

REACT JS

GIT , GITHUB

MS OFFICE

## PROJECTS

### Personal Portfolio Website

#### Used HTML, CSS and JAVASCRIPT

- Using HTML to structure the content of webpage, including header, navigation menu, about me, Resume, projects, Services and contact section.
- Write CSS rules to style the HTML elements and make the website visually appealing. Define colors, fonts, spacing and layout for different sections.
- Use JavaScript to implement animations, transitions and interactive elements, image sliders and pop-up modals. Handle user events like clicks, hovers and scrolls to trigger specific actions or behaviors. Validate user input in contact forms to ensure data accuracy and prevent spam submissions.

### E-Commerce Website

#### Used HTML, CSS, JAVASCRIPT and BOOTSTRAP

- Using HTML to create the layout and structure of different sections such as the Home section, Service section, About section, Shop section, Contact section and Footer section. HTML tags are used to define elements such as headers, navigation menus, product images, description and buttons.
- CSS features like Flexbox and Grid for responsive and flexible page structures and transitions, animations to create delightful user interactions.
- Employ JavaScript to implement client-side validation for forms, ensuring that user inputs are accurate and meet specified criteria before submission. Built reusable UI components and manage complex application states, enhancing maintainability and scalability.
- Bootstrap framework expedites development by offering a robust set of pre-designed components and responsive grid system. It create a fluid and responsive layout, ensuring optimal viewing experiences for users on desktops, tablets and smartphones.

### Profile Card App

#### Used REACT JS

- Implemented a reusable Profile Card component leveraging React component-based architecture, facilitating code organization and maintainability.
- Employed React props to pass data dynamically to the Profile Card component. JSX syntax to enhance readability and efficiency of code.
- CSS or styled-components, incorporating CSS Grid or Flexbox for layout flexibility and alignment control.
- Showcasing proficiency in project deployment and version control using Git. Creating an engaging user interface of front-end interactivity.
